

# Genomic tests price changes

This document is current as of 28 April 2026.

Test description	Notes/ sample type	New reduced price	Turnaround time
Medicare item #73358 Paediatric genomic testing <b>Singleton</b> WGS (blood) or exome (saliva)	For MBS eligible patients only (under 11 yrs)	Bulk billed	4-6 months
Medicare item #73359 Paediatric genomic testing <b>Trio</b> WGS (blood) or exome (saliva)	For MBS eligible patients only (under 11 yrs)	Bulk billed	8-10 weeks
Exome <i>comprehensive</i> (>400 genes +/- Mendeliome) <b>Singleton</b>	ORAcollect saliva	\$2,695	4-6 months
Exome <i>comprehensive</i> (>400 genes +/- Mendeliome) <b>Trio</b>	ORAcollect saliva	\$3,895	8-10 weeks
<b>WGS comprehensive</b> (>400 genes +/- Mendeliome) <b>Singleton</b>	EDTA Blood	\$2,695	4-6 months
<b>WGS comprehensive</b> (>400 genes +/- Mendeliome) <b>Trio</b>	EDTA Blood	\$3,895	8-10 weeks
WGS <i>focused</i> (<400 genes) Singleton	EDTA Blood	\$2,100	3-4 months
WGS <i>focused</i> (<400 genes) Trio	EDTA Blood	\$3,300	8-10 weeks
Rapid prenatal diagnosis Trio WGS	CVS/Amnio and EDTA blood from parents required	\$4,195	15 working days
Rapid prenatal diagnosis Trio exome	CVS/Amnio plus saliva provided for parents	\$4,195	15 working days
Rapid prenatal <i>targeted</i> exome (1-4 VCGS variants)	CVS/Amnio	\$750	15 working days
Rapid prenatal <i>targeted</i> exome (1 external variant)	CVS/amnio	\$1,050	15 working days
Rapid prenatal <i>targeted</i> WGS (1-4 VCGS variants)	CVS/Amnio	\$1,250	15 working days
Rapid prenatal <i>targeted</i> WGS (1 external variant)	CVS/Amnio	\$1,550	15 working days
WGS <i>targeted</i> (1-2 VCGS variants)	EDTA blood	\$950	3-4 months
WGS <i>targeted</i> (1 external variant)	EDTA blood	\$1,250	3-4 months

## Other changes

Comprehensive exome/WGS RAPID fee	\$1,300 per case	15 working days
-----------------------------------	------------------	-----------------

## Discontinued tests

Rapid trio exome fetal anomalies	Discontinued as of 4 May
Rapid prenatal exome focused singleton: Skeletal dysplasia/Hydrops	Discontinued as of 4 May
Rapid prenatal exome focused trio: Skeletal dysplasia/Hydrops	Discontinued as of 4 May

## Unchanged tests

Test description	Price
WGS or exome reanalysis fee	\$425 per case
Exome- <i>focused</i> (<400 genes)	\$1,800 (saliva or blood)
Exome- <i>targeted</i> (1-2 VCGS variants)	\$450
Exome- <i>targeted</i> (1 external variant)	\$750
Targeted exome/WGS RAPID fee	\$300 per case (15 working days)
Medicare #73456 Mitochondrial diseases (WGS- <i>focused</i> , singleton)	Bulk billed for MBS eligible patients (\$2,100 for equivalent test for clinically eligible patients in public clinics)
Medicare #73457 Mitochondrial diseases (WGS- <i>focused</i> , trio)	Bulk billed for MBS eligible patients (\$3,300 for equivalent test for clinically eligible patients seen in public clinics)
Mitochondrial genome NGS assay (mtDNA variants only)	\$1,200
Medicare #73298, #73401, #73402 Diagnostic renal testing (Exome <i>focused</i> )	Bulk billed for MBS eligible patients
Acute care genomics Ultra-rapid WGS trio	\$15,000
